Cycads

Young plants & seedlings The cycads are a distinct and ancient group, offering tremendous potential as ornamental plants. Many species are suited to a seasonal climate with hot summers and cool or even cold winters. Some are even frost hardy. Most prefer a sunny situation and very free draining compost. Grown in a container their symmetrical foliage makes a truly striking display. Ideal plants for the conservatory.

Cycas guizhouensis Guizou China. At 500m Alt. Trunk to 0.6m. Warm summers & frost free winters. 500ml pots Cycas parzhhuaensis Vunnan China. At 1500m Alt. Humid summers & cold dry winters. Sun & v good drainage. 500ml pots 18.00 Cycas guizhouensis 2 litre Cycas rumphi Widespread South China to New Caledonia. Sub-tropical tolerates some cold only for short periods. 45.00 Cycas taltungensis 3 litre. 45.00 Cycas taltungensis 3 litre. 45.00 Cycas taltungensis 3 litre. 46.00 Cycas taltungensis 4 litre 5 litre 6 li	eraking acepaig. Palms

Young plants and seedlings

Archontophoenix cunninghamiana 4yr.	00.00
Butia capitata S Brazil. One of the hardiest feather palms about -10 deg C. Very good container plant Full sun.	00.00
Chamaerops humilis AGM European fan palm. Better on windy sites than Trachycarpus and almost as hardy. Full sun. Chamaerops humilis var Cerifera Morocco. Atlas mountains. Attractive & hardy blue leafed variety. Germinated 1998.	6.00 23.00
Dypsis decipiens Madagascar. Attractive & frost tolerant palm.	00.00
Lytocaryum weddellianum Miniature coconut palm. Very attractive South American palm tolerant of cool conditions	
Rhapidophyllum hystrix S. Carolina in moist areas. Slow growing but very hardy, -17 degC. Germ 2000. 5litre.	95.00
Sabal minor SE USA Dwarf palmetto Usually trunkless slow growing fan palm. Full sun –12. Syagrus romanzoffiana Queen palm.2002 seedlings.	0.00 00.00
Trachycarpus fortunei AGM Most popular palm grown outdoors in this country. Sun or shade away from strong winds. 2 litre Trachycarpus martianus var. (2004) Himalayas up to 2000m. Sun. Tolerant of heavy frost. Trachycarpus princeps seedlings Trachycarpus wagnerianus Smaller stiffer leaf than fortunei. Germinated 2001.	7.00 24.00 19.00 25.00
Larger palms	
Brahea armata Mexico Blue Hesper Palm. Full sun and v. good drainage. Hardy to at least – 9° C. if kept fairly dry.	38.00
Chamaedorea radicalis 2 feet + high. 10L container. Hardiest Chamaedorea about – 8 deg. C. Chamaerops humilis European fan palm. Various sizes from Chamaerops Volcano Trachycarpus fortunei AGM Most popular palm grown outdoors in UK. Sun or shade away from strong winds. Trachycarpus wagnerianus Smaller stiffer leaves than T. fortunei. More wind tolerant and as hardy.	38.00 38.00 120.00 25.00
Trachycarpus princeps 12 litre 60cm	95.00

New Zealand Plants

Pseudopanax and various conifers.

Dacrycarpus dacrydioides

Libocedrus plumosa

Pseudopanax hybrids bred in New Zealand, highly ornamental Pseudopanax ferox over 2m. Pseudopanax ferox/crassifolius seedlings	7.00 55.00 8.00
Conifers include	

25.00

Brooklands Plants

Various other plants.

Aeonium nobile	-	
Aloe striatula 2litre	-	
Aloe ferox 9cm pots	-	
Aloes Various sp. From	6.00	
Agave americana Medio Picta Leaves with wide central pale stripe. Always in very limited numbers.	12.00	
Agave schidigera Mexico at 6000 ft. Medium sized Agave tolerant of heavy frosts. White-filiferous leaf. Sun and v. good drainage.	-	
Agave victoriae reginae Mexico. Small species. Very ornamental with overlapping packed dk. green leaves. 2litre	16.00	
Betula albosinensis and dahurica and utilis and others – seed grown	40.00	
Cordyline indivisa 2012 seedlings Hardy to at least -6deg C. Beautiful but very tricky when small. Various sizes.	8.00	
Callitris endlicheri – garden collected		
Dasylirion longissimum Germinated 1999.	-	
Dasylirion sp. Garden collected probably D. wheeleri. Germinated 2001.	12.50	
Dasylirion serratifolium specimen sized. Approx. 35L.	155.00	
Dasylirion texanum 9cm pots	-	
Doryanthes garden collected seed 5 years old. 4 litre	38.00	
Dyckia sp. Various. 4 years old	-	
Echium wildpretii. Tenerife. Seed pkt approx 6 seeds. Sow indoors early spring plant out from 9cm pots. Hardy to -3°C.	-	
Echium pininana La Palma. seed pkt approx 12 seeds	-	
Magnolia delavayi Large leafed evergreen species. Seedlings 60cm	42.00	
Magnolia macrophylla Germinated 1997. Large leafed hardy magnolia.	35.00	
Musa basjoo Banana, hardy outdoors with minimal winter protection. Quick growing and very striking. 3 - 4 feet high.	20.00	
Nothofagus cunninghamii – wild collected	15.00	
Pittosporum coriaceum Madeira – garden collected	00.00	
Puya alpestris Probably the best Puya, very unusual coloured flower and tolerant of light frost.		
Tetrapanax papyrifer From	0.00	
Xeronema callistemom - 3 year seedlings	0.00	
Yucca rigida Palmita blue yucca Mexico. Moderate frosts.		
Yucca rostrata Blue yucca N. Mexico. Moderate frosts.		
Yucca whipplei Our lords candle Calif. & Mexico. Moderate /Heavy frosts		
00.00 = out of stock/unavailable		

Terms & Other Information.

Hours: By appointment only for the collection of plants.

Alternatively, mail order (£25.00 for <10Kg) special delivery usually, or in certain cases can be arranged at cost for smaller plants. Mailing to mainland Europe is expensive, (around double the price to send outside of the UK.)

Min. plant value order generally £25.00. Its very time consuming packing and sending!

MAIL ORDER IS NOW ONLY AVAILABLE ON CERTAIN ITEMS (generally small plants)

Small parcels (1 plant) can go by first class mail and cost is on average £10.00

Cheques payable to lan Watt.

Email... Cycads@btinternet.com

Best time to Phone is 5pm to 7pm or at weekends. Please phone or email for more precise information on cycad availability and sizes. Photos of individual plants can be supplied.

Availability

Many of the plants are in <u>very</u> limited numbers and could possibly be sold out by the time you read this list. Please let me know what you are interested in by phone or email then I can get back to you with details on availability, price and importantly the size of the plant you are buying. I can also email a photo. Plants can be reserved by phone or email for a week.

Plants not priced are unavailable at the moment.

Seedlings/young plants are mainly 1 to 5 years old. Prices can vary depending on size & age.

Frost tolerance. The minimum temperatures mentioned give a rough guide to hardiness on mature and semi mature plants, however to avoid risk plants should be kept above these temperatures especially when small. Cold weather is tolerated far less when it's combined with wet conditions, above and below ground. Warmth and a long growing season provided by a greenhouse or conservatory helps in achieving maximum growth rates in some species especially the cycads. The majority of the plants listed are exposed to near freezing during winter. Perlite and / or bark are included in the compost mix at a rate of up to 60% to improve drainage and aeration. This can make the difference between success and failure with cycads and some palms. As a rule cycads should be kept just on the moist side in the cooler months with low/med humidity, palms should never be allowed dry out. In the summer water more freely depending on the species with higher humidity and good air exchange. Attention to correct watering is very very important with cycads. Correct humidity can be very important with more sensitive plants.

Every effort is made to ensure plants are true to name, however this cannot be guaranteed on some of the lesser-known species. That said, I have had no problems so far.
